DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 8 is rejected under 35 U.S.C. 102(b) as being anticipated by Geer.

Geer discloses a method for combining liquid such as glue or asphalt emulsion (page 1, lines 72-75) is contained in a container 5, providing filler material such as sand is contained in a container 4, compressor 11 for pressurizing both containers 4 and 5 with air as a blowing agent, valve 55 for regulating the pressure to the filler container, a spacing device 16 combine with the pressurized air to meter the filler material for mixing with the liquid at or beyond a discharge nozzle 8 of a spray gun (page 1, lines 1-5), a hose 6 connected to the filler container 4, and a hose 7 for connecting to the liquid container 5. The compressor 11 pressurizing the liquid container 5 to pump the liquid 14 contain within the container to the spray gun 8.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Geer.

Geer teaches all the limitations of the claims except for a spray gun with an outer chamber for the filler material circumferentially surrounding the inner chamber for the liquid. However, it would have been obvious to one having ordinary skill in the art to have provided the device of Geer a spray gun with an outer chamber for the filler material circumferentially surrounding the inner chamber for the liquid is deemed to be an obvious matter of design choice, since either Geer spray gun or the claimed spray gun would perform the same function of mixing and dispensing the mixture.

Allowable Subject Matter

5. Claims 1-7 and 10 are allowed.

Response to Arguments

6. Applicant's arguments filed July 01, 2004 have been fully considered but they are not persuasive. In claim 8, Applicant does not specifying what is the pumping device for pumping the liquid in the liquid component pumping system. The Geer device utilizing the compressor 11 for pumping the liquid 14 in the container 5.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
